

# MISTRAL

324 ENC

OPERATOR FOR SWING LEAF GATES

Technology in movement.

GENIUS®

GATE AUTOMATION

## STATE-OF-THE-ART AUTOMATION

Mistral 324 ENC, the point of reference for swing gates.

# MISTRAL 324 ENC

### High reliability.

- A robust internal kinematics mechanism, including a bronze gear/steel worm screw, grants high reliability.
- IP54 protection class.

### High thrust

- The axis thrust develops a remarkable power which enables doors of up to three metres to be moved.

### High safety

- The standard encoder checks the exact position of the door and, in many applications, can also reduce the number of accessories needed to satisfy the safety requirements in compliance with European standards.

## TECHNICAL SPECIFICATIONS

Technical Specifications	Mistral 324ENC
Motor power supply	24 Vdc
Motor nominal power	35 W
Thrust Max.	150 daN
Travel	300 mm
Rod exit speed	1,6 - 2,1cm/sec
Max. leaf	3 m
Type and frequency of use at 20°C	Residential
Recommended daily cycles	80
Max. continuous cycles	30
Operating ambient temperature	-20C + 55C
Operator weight	7,5 Kg
Protection class	IP54
